LABORATORIES, RESEARCH & DEVELOPMENT

1. QUALITY CHECK

- Aspect and surface irregularity control
- Width measurement
- Thickness measurement
- Specular gloss measurement
- Surface roughness measurement
- Opacity measurement
- Surface tension measurement
- Hot dimensional stability measurement
- Color measurement with spectrophotometer
- Tensile properties measurement
- Digital printing test with eco solvent inks
- Screen printing test with solvent and UV inks
- GC and GC-MS analysis in phthalate free materials

2. RESEARCH & DEVELOPMENT

- Color matching
- New formulation and new raw materials tests with thermal roll mixer
- Shore A - Shore D
- Transparency measurement
- QUV-A, QUV-B and Xeno accelerated weather tests
- Composition analysis of ours and competitors materials
- Quantitative analysis of plasticizer by solvent extraction
- Qualitative plasticizers analysis with GC
- Qualitative plasticizers analysis with IR spectrophotometer
- Qualitative and quantitative analysis of additives with IR spectrophotometer
- Analysis of metals with AA spectrophotometer
- Thermal analysis of polyolefins with DSC
